

MAYO CLINIC
LABORATORIES

Lessons learned from COVID-19

William Morice II, M.D., Ph.D.
President, Mayo Clinic Laboratories

Pandemic has highlighted several key healthcare needs

- More dynamic and agile global clinical diagnostics capability
- Greater access to diagnostic testing for optimal healthcare delivery
- Increased access to testing in economically disadvantaged communities
- Modernization of regulatory frameworks for diagnostics and therapeutics
- Closer working relationships between diagnostic laboratory and manufacturers

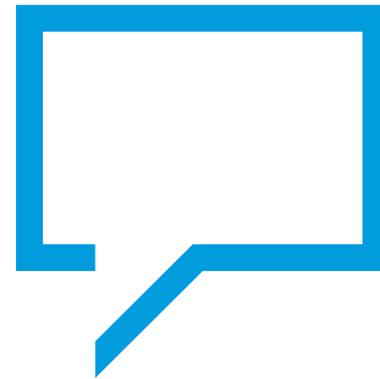

COVID impact on the lab landscape in 2021 and beyond

- Sustained interest in patient access to testing outside of health care settings, driven by:
 - convenience
 - improved access
 - movement toward virtual care delivery
- Drive to understand how diagnostic information can improve outcomes
- Reimagining of the clinical laboratory and the diagnostics ecosystem
